

Towed Machines - Three Axle Trailer

Mastering the Functionality

Solutions for

Wheel Pressure Control

- Air Regulating System (Directional Control Valve LVS)

Lift Axle

- Lifting, Lowering, Floating (Directional Control Valve LVS)

Undercarriage

- Lifting, Lowering, Leveling (Directional Control Valve LVS, Cylinder Series FSD)

Steering

- Axle 1/3
 (Trailing Axle/Leading Axle,
 Slope-drift Function)
 (Directional Control Valve LVS)
- Locking System (System Manifold Block)

Support Leg

- Retract/Extend
(Directional Control Valve LVS + SVH04)

Drawbar Suspension

Leveling, Accumulator Pretension
 (Directional Control Valve LVS + SVH04,
 Cylinder Series DW)

Master Control

(System Manifold Block)
