

4/2 and 4/3 Directional Spool Valves, ISO Size 03

Q_{max} = 80 l/min, p_{max} = 350 bar Direct acting, solenoid operated Series WEDO...

- For controlling the starting, stopping, and direction of a flow
- Manifold-mounting design, interface to ISO 4401-03-02
- Operated by DC or AC solenoids
- Very reliable functions and extremely stable
- · With manual override
- Solenoid coils can be changed quickly and easily without leakage from hydraulics system.

1 Description

The WEDO-...-6... series of directional spool valves are solenoid operated, direct acting, manifold-mounting valves with a size 03 interface to ISO 4401-03-02. The main components of the valves are a steel body, either one or two solenoids, the control spool, and either one or two return springs. In the non-operated state, the return springs hold the control spool in the middle position or initial position. The control spool is operated by the DC or AC solenoids, which

are of the oil-immersed type. The integral manual override can be used to move the spool without energizing the coil, for example during a power failure. These 4/3 and 4/2 directional valves are used in plant and machines to control the direction of a flow, and to stop the flow. The slip-on coils can be replaced without opening the hydraulic envelope and can be positioned at any angle through 4x90°. The version WEDO-42-C-6... is fitted with a mechanical detent setting.

IMPORTANT!

The indicated performance limits apply when symmetrical flows pass through the valve. For non-symmetrical flows, the max. flows are substantially reduced, in worst cases to 33%.

5 Installation information

ATTENTION!

Only qualified personnel with mechanical skills may carry out any maintenance work. Generally, the only work that should ever be undertaken is to check, and possibly replace, the seals. When changing seals, oil or grease the new seals thoroughly before fitting them.

IMPORTANT!

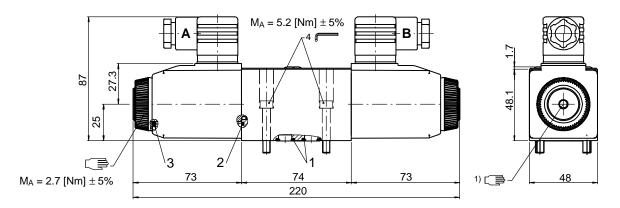

When fitting the valves, use the specified tightening torque for the mounting bolts. No adjustments are necessary, since the cartridges are set in the factory.
