

Lock valve

Check valve

$Q_{max} = 10 \text{ gpm}$, $p_{max} = 5000 \text{ psi}$
poppet type, hydraulically operated
Type series: CVPF-08-...

- Screw-in cartridge valve
- For cavity C0820
- All external parts zinc plated, chromited (CrVI-free)
- Installation in threaded port body type B0820
- Wide selection of bias springs allows flexibility for back-pressure application

Description

This unit is a screw-in cartridge style, guided poppet, hydraulic check valve, for use as a blocking or load holding device for high pressure applications. This

valve allows free flow from port 1 to port 2 and blocks flow from port 2 to port 1 or holding a load.

Installation information

ATTENTION!

Only qualified personnel with mechanical skills may carry out any maintenance work. Generally, the only work that should ever be undertaken is to check, and possibly replace, the seals. When changing seals, oil or grease the new seals thoroughly before fitting them.

NOTE!

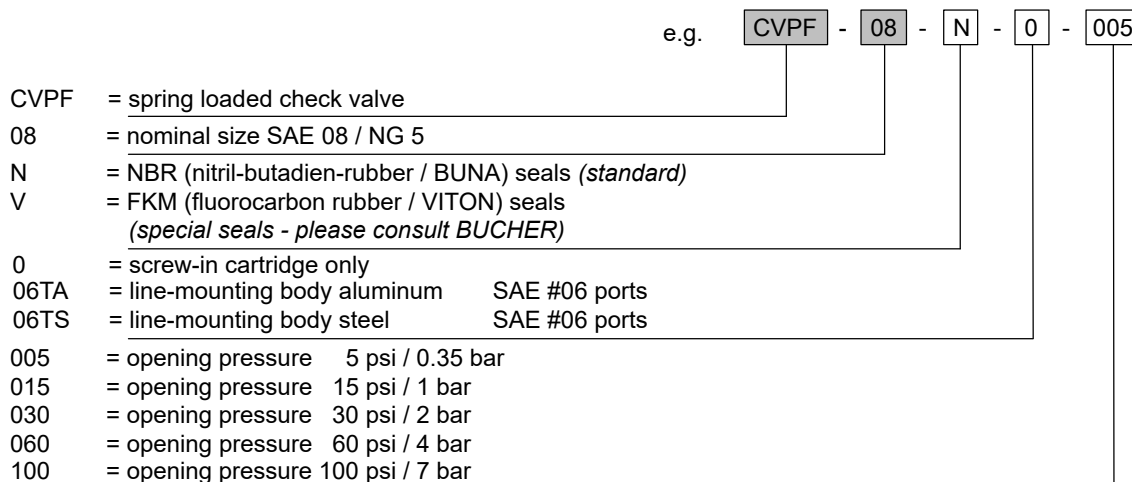

The seals are not available individually. The seal kit order number can be found in the chapter "Technical data".

NOTE!

1) When fitting the screw-in cartridge valve, use the specified tightening torque. The value can be found in the chapter "Technical data".
